

Hardie® Reveal™ Panel

**An affordable aesthetic solution
with James Hardie Quality**

Hardie® Reveal™ Panel delivers clean lines, design flexibility and a high-end panel aesthetic. Every time.

A Superior Flat Wall Look Without the Hassle

Reduce out-of-pocket costs

- Starting at \$9 to \$11 per-square-foot, Reveal is an affordable panel solution versus imported systems and alternative claddings
- Reveal Panel and trims are delivered directly to your job site from James Hardie

Reduce your risk with Reveal durability

- Reveal is superior to ad-hoc 5/16" panel solutions
 - James Hardie testing of 7/16" Hardie® Reveal™ Panel indicates a 25% increase in resistance to impact fractures when compared to 5/16" HardiePanel® siding.
 - Designed specifically for demanding multifamily and light commercial environments
 - Single source James Hardie accountability
 - Hardie® Reveal™ Panel is exclusive to the multifamily and light commercial segment
- Delivers customized climate protection with the James Hardie 7th generation fiber cement formulation
- The HardieZone™ System - Engineered for Climate™ formulation and local install support
- Backed up with Cad Details, Spec Wizard at Arcat.com, Compliance & Testing Documentation
- Covered by our strongest warranty ever – 30-year nonprorated warranty

Deliver a high-end aesthetic every time

- Thicker panels with deep reveals deliver accentuated shadows
- Reveal is superior to ad-hoc 5/16th panel solutions
 - Superior on-the-wall flatness
 - Fewer fasteners
 - Allows for off stud abutments
 - Superior stud alignment flexibility
 - Proven paint adhesion and crack resistance
- Reveal is superior to stucco
 - No wait time for curing
 - Resists cracking
 - No more tool damage to windows
- Versatile panel for true design flexibility and broad design options
- Applicable to steel frame, wood frame, direct to sheathing, and rainscreen

A Comprehensive Aesthetic Solution

Hardie® Reveal™ Panel and Reveal™ Trims can be utilized together to create an effective modern, panelized look on your mid-rise multifamily, light commercial or institutional building. These products can be applied directly to the HardieWrap™ weather barrier or other weather resistant barrier and sheathing or they can be furred out to create a rainscreen behind the panel. Hardie® Reveal™ Panel and Reveal™ Trims do not form a moisture management system; the architect and builder are responsible for designing and installing a code compliant building envelope.

Product Specifications

Hardie Reveal Panel – *Texture: Smooth, Thickness: 7/16", Weight: 3.1 lbs/sq. ft., Nominal Width: 4' x 8', Actual size adjusted for the reveal: 47½" x 95½"*

Drip Cap Trim – Used to flash above windows, doors and other penetrations. (1.25" projection)
Qty: 10 per box, Length: 12', Clear: 280150, Chem Film: 280151

Vertical Trim – Utilize as vertical trim when abutting panels and producing a ½" Reveal. Vertical Trim is designed to fit under Horizontal Trim. Never install Vertical Trims in horizontal applications. (See Warning Below)
Qty: 20 per box, Length: 12', Clear: 280110, Chem Film: 280111

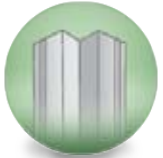

Horizontal Trim – Designed to be installed at horizontal abutments of panel and run in a continuous detail across the face of the structure.
Qty: 20 per box, Length: 12', Clear: 280100, Chem Film: 280101

Outside Corner Trim – Utilized on the outside corners of structure to provides a clean aesthetic detail. James Hardie recommends running this in a continuous vertical detail from bottom to top of corner.
Qty: 10 per box, Length: 12', Clear: 280120, Chem Film: 280121

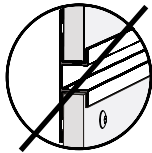

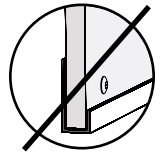

Horizontal Trim Termination – Factory cut ends for termination into outside corner trims. One end has left hand cut with the other end having a right end cut.
Qty: 20 per box, Length: 12', Clear: 280102, Chem Film: 280103

Inside Corner Trim – Used to complete inside corners of structure. James Hardie recommends running this in a continuous vertical detail from bottom to top of corner.
Qty: 10 per box, Length: 12', Clear: 280130, Chem Film: 280131

J-Channel Trim – Designed to terminate panels when abutting windows, doors or other penetrations. Never install J Channel in a manner that exterior flange can catch water. J Channel should not be used on the top header of doors or windows. (See Warning Below)
Qty: 10 per box, Length: 12', Clear: 280140, Chem Film: 280141

WARNING: Do not install Reveal J-Channel or Vertical Trim on Horizontal applications where the exterior flange will collect water. They are for vertical use only.
